

Team Members: Anas Elhadidy, Eizat Mushtaq, Faisal Khan, Milan Ghori
Class Section: CPSC 462-01 (12689)
Team Number: 13
Scenario name: Starting system
Actor: Admin

Description: In this scenario, the admin starts the application.

Path of the Scenario:

The scenario is a user-goal oriented task where the user starts the system.

1. In windows OS, the system can be started by running the EmployeeBenefitSystem.jar file. In Linux, the system can be started by running the command "java EmployeeBenefitSystem.jar".
2. The system will start, and it will display the login options to the admin
3. The admin will enter choice 1 and will be prompted to login screen.
4. Other actors can now start using the system by entering their credentials.
